

# VIBRO SIFTER 2 IN 1 WITH BUILT-IN MAGNET

SYSTEM FOR FOOD  
POWDERS SIFTING

**AGRIFLEX<sup>®</sup>**

since 1975

## VIBRO SIFTER 2 IN 1

# SYSTEM FOR FOOD POWDERS SIFTING

It can be installed on the pneumatic line or loaded by gravity. **Deep inspection and cleaning are guaranteed.** The system fits in the ATEX area (presence of potentially explosive atmosphere).

## ADVANTAGES

### EXTRACTION SYSTEM OF METAL MAGNETIC PRODUCTS

The two magnets installed in the inlet of the sifter make it easy and guarantee the extraction of the metal impurities.

The inlet where the magnets are installed is an expandable cylindrical shape which allows the product flow to slow down the speed.

### DOUBLE EFFECT SIFTING

It is possible to use very refined meshes, sieving is extremely simple and fast. There is no product accumulation on the sieve mesh, so there are no mechanical strains.

**The double effect sifting is made from:**

1. The vibrator on top generates the first sieving on the first net mesh
2. 50 balls (Ø 40 mm. in plastic material, food approved) placed in between the sieve net mesh and the perforated metal sheet which creates additional movement.

### EASY INSPECTION AND CLEANING

The structure is specially designed to guarantee an easy inspection and sanitizing, from inside and outside.

All our products comply with:

All regulations for specific applications  
(ATEX, food regulations, safety, seismic  
codes etc.)
